MEMORANDUM

FROM: Deanna Scher, Chemical Review Manager
Reregistration Branch I
Special Review and Reregistration Division (7508C)

TO: OPP Public Docket

SUBJECT: Meeting with BASF to Discuss Vinclozolin Risk Issues and Risk Management

This document summarizes the meeting held on 05/02/00 between SRRD staff and BASF to discuss the outstanding risk issues surrounding vinclozolin. These issues included characterization of the acute dietary risk assessment, the appropriate methodology to assess cancer risk, and determining the need for a cumulative assessment.

The Agency has been actively working to resolve these issues in order to complete the upcoming RED and to reach a decision on the snap bean and canola petitions. Some immediate risk reduction measures, such as re-stickering turf products with a pre-harvest interval, were proposed. Longer term measures, such as use cancellation, were also discussed.
